## Re: Application for Data Engineer (m/f/d) - MDM Platform Solutions

Dear Hiring Team at ALDI Nord Group,

I am writing to apply for the position of **Data Engineer (m/f/d) - MDM Platform Solutions** at ALDI Nord. I am currently pursuing a Master's degree in Artificial Intelligence at BTU Cottbus-Senftenberg and bring over 3 years of professional experience building scalable data platforms at Ericsson. I am highly motivated to contribute to ALDI Nord's mission of providing reliable data infrastructure that powers retail operations across Europe.

At Ericsson, I designed and maintained **Apache Airflow-based data pipelines processing 30,000+ XML files daily** with comprehensive schema validation. I implemented **automated data quality checks** ensuring 99%+ accuracy and optimized workflows that reduced processing time by 90% (from 12 hours to 1 hour). My experience in SQL, data modeling, and ETL/ELT pipeline development directly aligns with your requirements for scalable data models and quality assurance processes.

The opportunity to work on Master Data Management solutions at retail scale, ensuring data consistency across 5,400 stores in 8 countries, is exactly the challenge I am seeking. While I have not worked specifically with PIM/MDM systems, my experience designing data models, implementing quality frameworks, and ensuring consistency across distributed systems provides a strong foundation. I am eager to grow into technical leadership while building innovative platform solutions.

Based in Berlin with German residency, I am fully available for the hybrid working model and excited about working from the ALDI Nord campus in Essen. My German skills (A2, actively improving) combined with fluent English (C1) enable effective communication in your international environment.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience can contribute to ALDI Nord's data engineering initiatives. I am available immediately, and my salary expectations are EUR 18,000–20,000 gross annual (part time), negotiable based on the total package.

Best regards,

Khaleel Ahmad
